

The Second Branch, the Evidence

Proof that makes the reason strong

Grade 3 • Cluster 2 • Module 4

WHAT WE ARE LEARNING

This week your child is learning to add **evidence**, the proof from the text that makes each reason strong and believable.

Esta semana su hijo aprende a anadir evidencia, la prueba del texto que hace fuerte cada razon.

NOTICE IT TOGETHER

When your child claims something, playfully ask, "can you prove it?" Finding proof is exactly the skill this week.

Cuando su hijo afirme algo, pregunte con carino: puedes probarlo?

TALK ABOUT IT

Ask your child: "**What proof would make someone believe your reason?**"

Pregunte: que prueba haria que alguien creyera tu razon?

TRY THIS TOGETHER (NO MATERIALS NEEDED)

Play **Prove It**. Make a simple claim about your home, "this is the comfiest chair." The other has to point to real proof for it. Then switch.

Jueguen a Pruebalo. Hagan una afirmacion sencilla y el otro senala una prueba real. Luego cambien.

How to help without giving the answer. Just keep asking for the proof, not the opinion. Help your child see the difference between saying something and showing it is true.
