

From Question to Solution

Researching a real problem

Grade 3 • Cluster 8 • Module 2

WHAT WE ARE LEARNING

This week your child is learning to research a **problem** and use what they find to think toward a solution.

Esta semana su hijo aprende a investigar un problema y pensar en una solución.

NOTICE IT TOGETHER

When something is a hassle at home, ask your child how they might find out a better way.

Cuando algo sea un problema en casa, pregunte como averiguaría una mejor manera.

TALK ABOUT IT

Ask your child: "What is the problem exactly, and what would you need to learn to solve it?"

Pregunte: cual es el problema exacto y que necesitarías aprender para resolverlo?

TRY THIS TOGETHER (NO MATERIALS NEEDED)

Play **Problem Solvers**. Name a small household problem and brainstorm together what facts would help solve it.

Jueguen a Resuelve-Problemas. Nombren un problema pequeno y piensen que datos ayudarian.

How to help without giving the answer. Just help name the problem clearly first. A well-stated problem is already halfway to a solution.
